## Duty of care

Oakridge FC owes a duty of care to its players and staff. This policy defines medical confidentiality, treatment-room protocols and the club's welfare framework.

## Concussion management

Suspected concussion is managed under the graduated return-to-play protocol. No player returns to contact training or matchday selection without Club Doctor clearance.

## Confidentiality and access

Clinical detail is held by the Club Doctor and medical team. Coaching staff see availability flags only — for example a modified-load recommendation — never the underlying clinical data.

## Mental health

An independent welfare reporting line is available to all players and staff. The club signposts to PFA and external clinical support and treats wellbeing as a season-long responsibility.

## Ownership

Owned by the Club Doctor with sign-off from the Director of Football. Last reviewed February 2026.
